Story Design

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for data storytelling, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

In Tableau, **Story** is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way.

[Tableau Story View 2: Detailed Performance Breakdown & Environmental Impact]

Observations & Story Points

- **Story Point 1 — Market Snapshot:** 1.55B total EV sales at an average price of $64,921, with India, China, and Vietnam leading production output.
- **Story Point 2 — Range and Value:** Luxury Sedans and SUVs offer the longest range, and Electric Buses retain the most value after 3 years ($14.5M).
- **Story Point 3 — Sales Trend:** Annual sales are stable from 2018 to 2026, led by Two-Wheeler Scooters, while Electric Trucks sell the least.
- **Story Point 4 — Battery Technology:** NMC and LFP batteries lead in sales units, while Solid-State and LFP show the longest cycle life.
- **Story Point 5 — Charging and Impact:** High-capacity vehicles charge fastest (about 350 kW) but use more energy per km, and 738K tons of CO2 are saved per year across regions.

Activity 2: Tableau Public Deployment

Publish Story on Tableau Public and paste the public link below:
