Business Question and Visualization Report

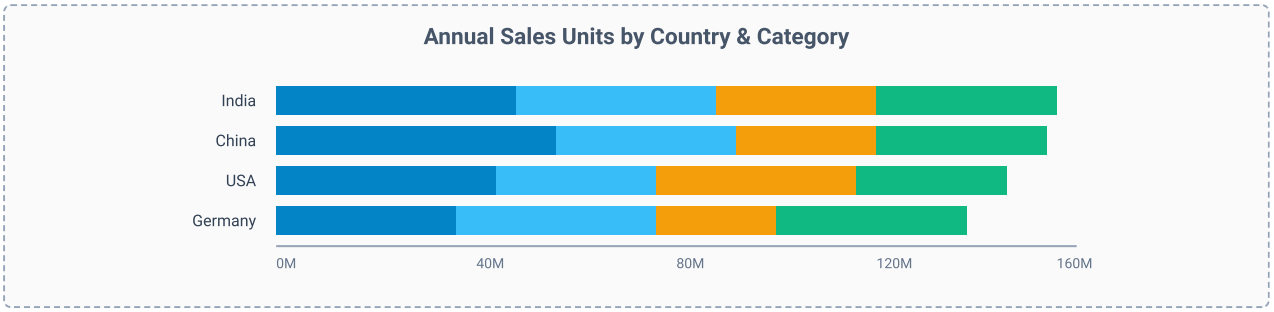

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience.

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations in Tableau.

1. Which countries and vehicle categories lead EV production and annual sales?

Visualization: Stacked bar chart of annual sales units by country and vehicle category.

Team ID	EN2EL3010078
Project Name	EV Market Performance and Insights

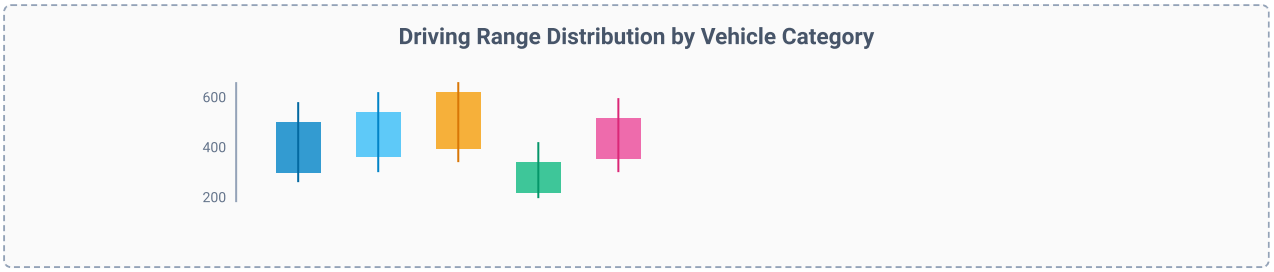

2. Which manufacturers perform best on customer reviews and sales units?

Visualization: Packed bubble chart of manufacturers by customer review and sales units.

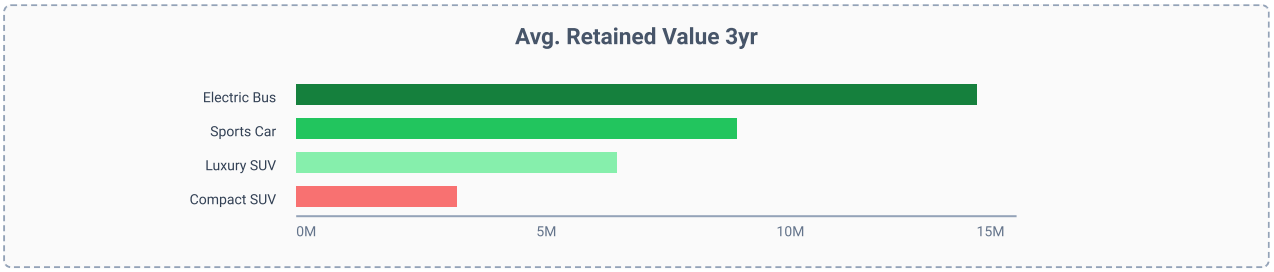

3. How does driving range vary across vehicle categories?

Visualization: Box plot of driving range (km) by vehicle category.

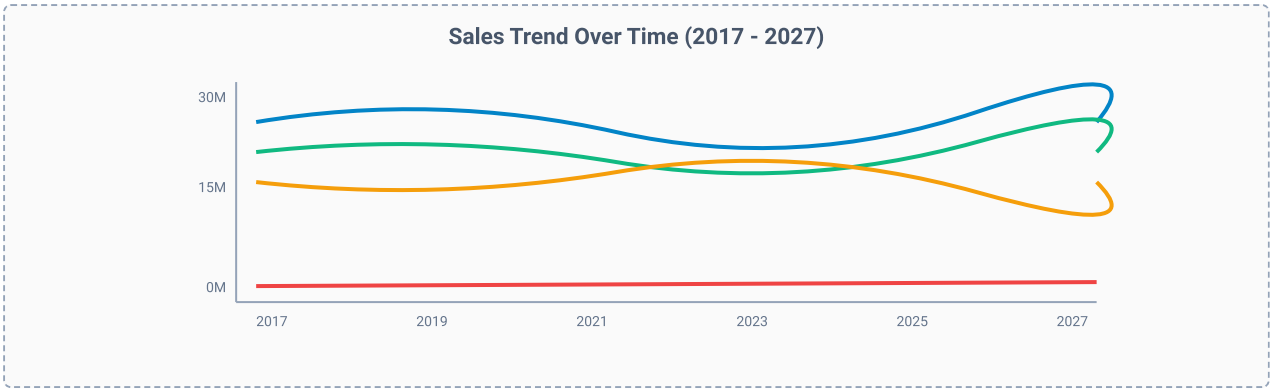

4. Which vehicle categories retain the most value after 3 years?

Visualization: Bar chart of average retained value by vehicle category.

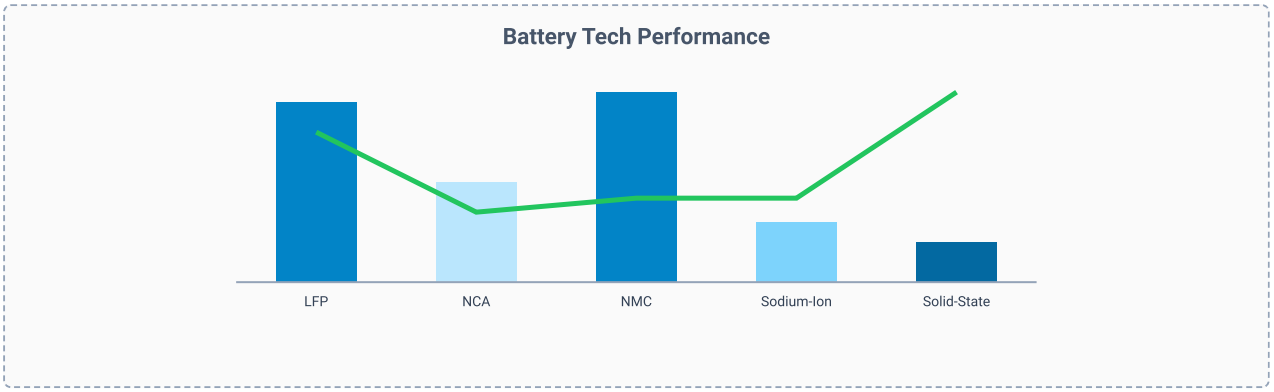

5. How have annual sales trended over the years for each category?

Visualization: Multi-line chart of annual sales units by model year.

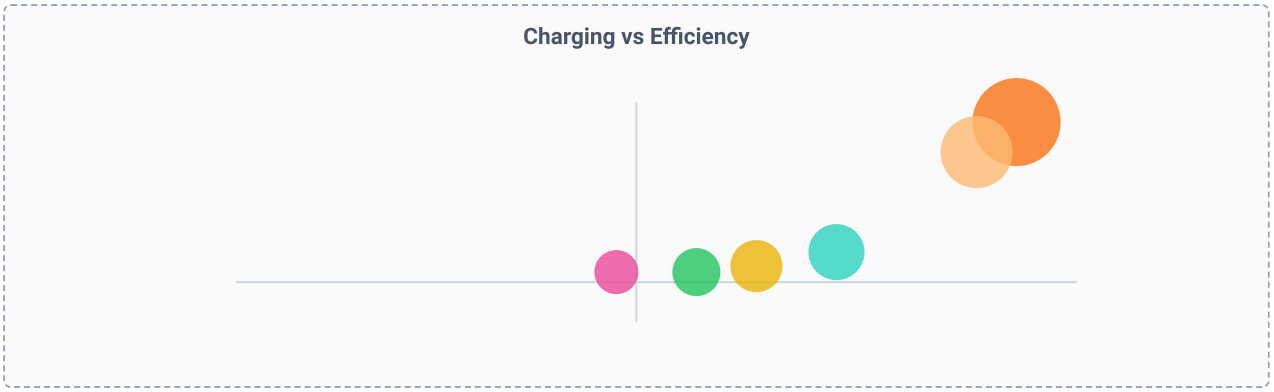

6. Which battery technologies dominate sales, and how do they compare on cycle life?

Visualization: Dual-axis bar and line chart of sales units and average cycle life by battery type.

7. How do charging speed and energy efficiency relate across vehicles?

Visualization: Bubble (scatter) chart of max DC charging kW vs efficiency Wh per km.

8. How much CO2 is saved across regions and drivetrains?

Visualization: Regional stacked area chart of CO2 saved (tons per year) by drivetrain.
